ONLINE BACKUP AND RESTORE

COMPLETE DATA PROTECTION

Reliable, secure backup and restore capabilities are crucial to all businesses, but traditional methods of data backup have often proven cumbersome and costly. Now you can solve this problem with this affordable, easily managed and easily deployed solution. Technology Force's Online Backup and Restore, powered by VaultLogix, provides an automatic online backup and restore service you can count on.

On-Demand Data Restoration

Lost files and computer downtime caused by user error and corrupted tape drives occur regularly and are the source of significant — but often hidden — business costs. In addition, restoring data from tape can take an inordinate amount of time and sometimes even fail, causing a direct impact to the business. Technology Force's Online Backup and Restore ensures that your crucial data can be restored quickly, easily and on demand.

A Solution You Can Trust

Many companies trust the backup of their data to a fragmented and often ineffective policy of distributed tape devices, manual routines and off-site tape storage. Online backup and restore provides a

unique, automatic, safe approach to data storage by offering:

- A fully automated process with backups saved on disk for rapid file restoration
- Secure online transfer of fully encrypted data to an off-site data center, ensuring regular backups are stored safely and remotely
- Automated alert if backup fails

By choosing Technology Force's Online Backup and Restore as your managed services offering, you'll benefit from its ease of use, efficiency, and ability to improve business operations.

Key Features

- Centralized, automated backup of PCs, file servers and application/database servers
- Immediate recovery process for quick online data restoration
- Agentless backup software, for easy installations
- Common file elimination and compression to ensure bandwidth and storage requirements are minimized
- Open file management that enables backup of almost any file
- Securely transmitted data at encryption levels exceeding standard government and banking requirements
- Centralized control: View backup sets from one interface that integrates with leading remote monitoring and management

Security of your critical data is more crucial than ever before. Put a stop to interruptions before they start with instant backup and restore services. Contact Technology Force at 612-508-5665 or visit us online at technologyforce.com.
